Education

Virginia Tech – B.S. Statistics, B.A. Sports Media & Analytics | May 2026 | GPA: 3.6/4.0

Relevant Coursework: Theoretical Statistics, Bayesian Statistics, Regression Analysis, Experimental Design

Skills

Programming & Tools: R, Python, SQL, Tableau, Excel, Git/GitHub, Microsoft Office

Research & Communication: Data visualization, analytical reporting, technical writing, presentation design

Quantitative Methods: Statistical inference, regression modeling, exploratory data analysis

Experience

Basketball Analytics Contributor – TipOffBall | Fall 2025 - Present

- Conduct quantitative analysis in R to identify trends and generate insights supporting player and team evaluation
- Create visual reports and written analysis translating findings into clear insights; published work generated 250,000+ X views and 100,000+ Instagram engagements

Student Manager, Video & Analytics Support – Virginia Tech Women's Basketball | Aug 2024 - May 2026

- Code and analyze practices and games using Hudl Sportscode and Keemotion to support scouting, player development, opponent preparation, and in-game analysis
- Develop tracking systems and summarize findings to support staff decision-making
- Organized and verified performance data to improve consistency across internal reporting

Student Employee – Virginia Tech Undergraduate Admissions | Aug 2022 – May 2026

- Supported campus visits, admissions events, and prospective student engagement in a high-volume public-facing role
- Delivered welcome remarks to 3,000+ incoming students and families during Hokie Focus

Undergraduate Grader: Biological Statistics – Virginia Tech Department of Statistics | Fall 2025

- Evaluated R Markdown assignments involving statistical modeling, inference, and data analysis

Research & Projects

Undergraduate Research: Practice Hustle & Performance Impact

- Built an R/Quarto dashboard and analytical workflow to identify performance trends and communicate findings through written reporting

Women's College Basketball 2K Rating Model

- Developed a player rating model using weighted statistical metrics to compare Division I women's basketball players

Undergraduate Friendship Communication Survey Research

- Designed survey methodology, analyzed response data using ANOVA and t-tests, created visualizations, and summarized findings in an 11-page report
